

Website Feedbacks

1. Make sure the image is visible all the time its only visible when my mouse pointer reaches there.

2. This boundary doesn't feel like cart to me. if you want it to feel like a cart can you also put the same boundary on sides also and see how it looks. Otherwise remove them but keeping only at top doesn't look nice.

3. Previous feedback impediment it for the all carts where you have mentioned this boundary
4. The present format is good if we have only one advisory member but now that we have more than 1 advisory member make changes accordingly. For more information about the other advisory you can ask kundun for the info.

ADVISORY TEAM

Deep domain expertise and strategic guidance.

Dr. Shreekant Bharti
Medical Officer

10+
Years experience

AIIMS Patna
Organization

10+ yrs

About

Dr. Shreekant Bharti is an Additional Professor in the Department of Pathology at AIIMS Patna with expertise in histopathology, cytopathology, immunohistochemistry, immunofluorescence, PCR, FISH/CISH and cytogenetics.

Medical device validation and testing protocols Clinical pathway integration strategies

Healthcare industry compliance guidance Medical professional training programs

5. Somehow this part still feels like our Incubation is of same colour i know it isn't but at first glare it seems so unless i focus more on it make sure the color gradient is quite visible at first look like the fading is clearly visible for partners text. In similar way make it noticeable the fading dark blue to lite blue

OUR PARTNERSHIP

Our Incubation Partners

Collaborating with leading research and incubation ecosystems to accelerate impactful AI-driven healthcare technologies.

6. Recognition and partners look too small in section to adequately fit the screen.

RECOGNITIONS & PARTNERS

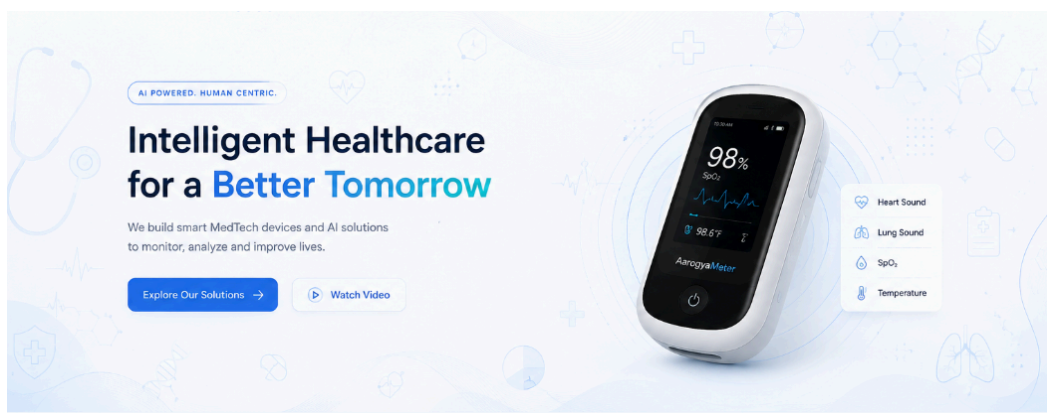

Supported By Leading Innovation Ecosystems

IndiTronix AI Labs is supported and recognized by innovation, startup and technology ecosystems driving deep-tech healthcare innovation in India.

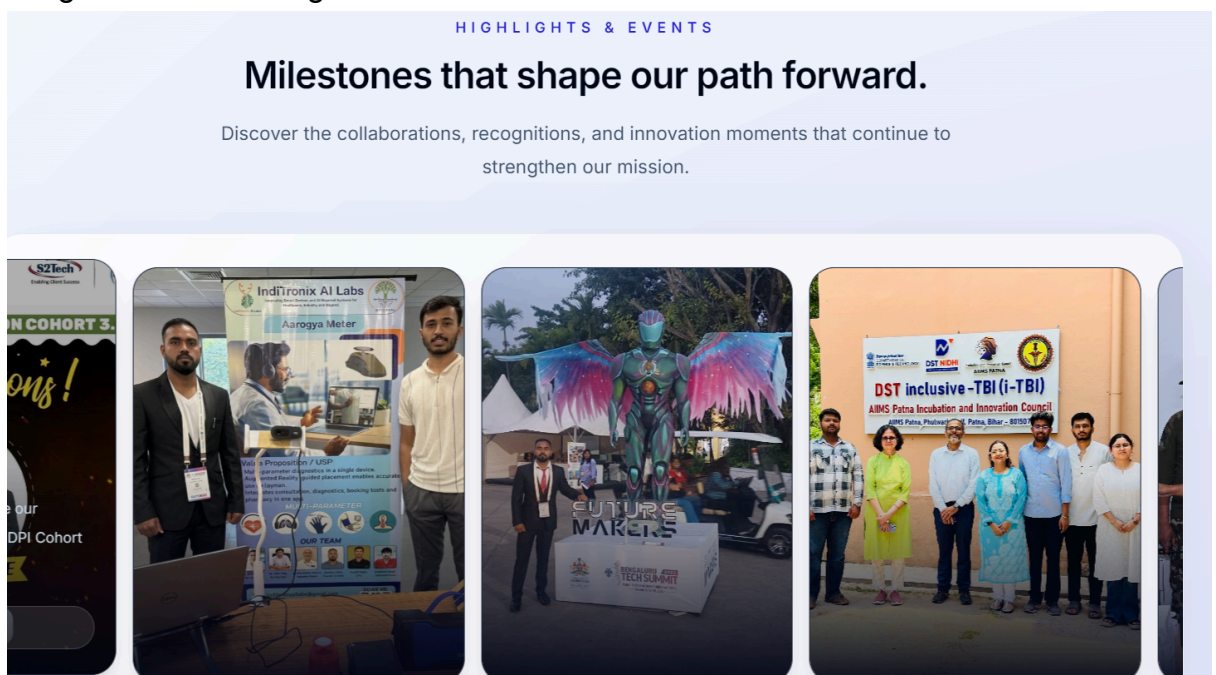

7. The background is so plain like only a blue shade plain background .Can you add some figures or texture to it like maybe a stethoscope texture or some other texture which fits perfectly.

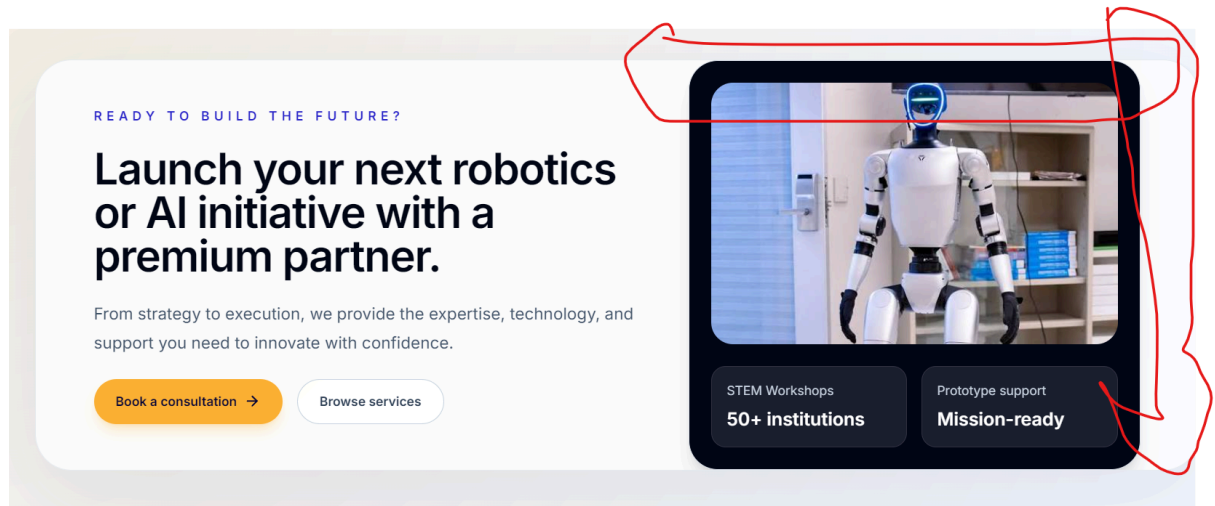

Example:

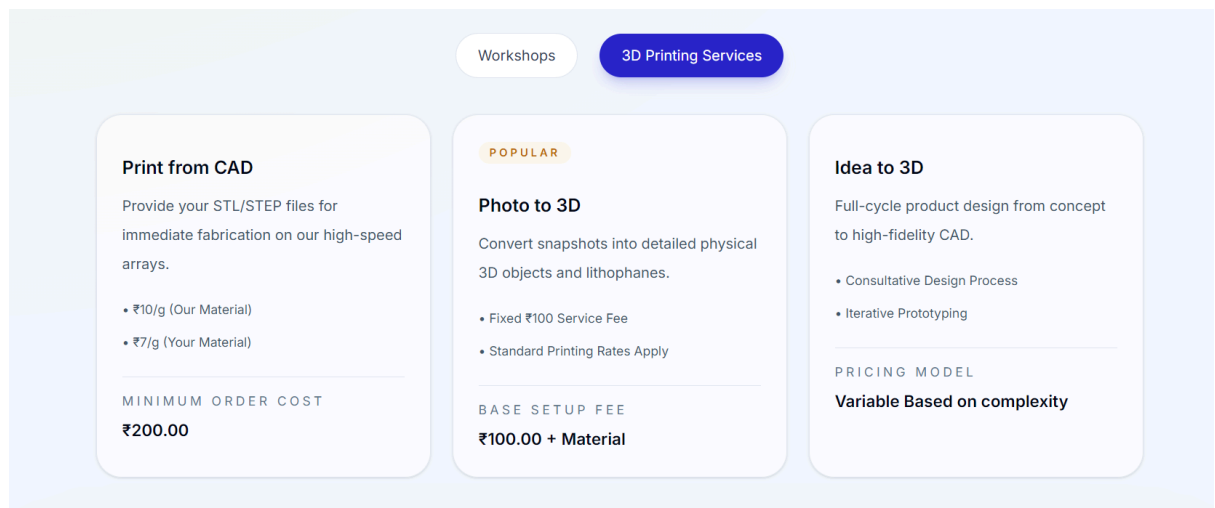

8. In the photo section why there is white background make sure it feels like it merged with the background.

9. The product page is not made correctly at all; there is no content and only 2 sections were inside the page. I also made the product section on my snitch see content there and fix the UI and add content and make it looks more like a well defined product website page.
10. The image is touching the boundary here and why there is gap after image to boundary. Fix those small issues.

11. Add images at the background of the cart text just like you did on the home page. and make sure the heading are in line here you have added popular that made the photo to 3D heading go down don't do it add popular on the space above .fix this small issues

12. Add background shapes for the section, don't keep it plain, add some relevant ones just like the example I have given in point 7. The shapes should define the section for supposed 3d printing; it can be design ,scale ,compass etc.
13. The text doesn't fit properly make sure it looks good on the screen here some text and tables touching the boundary. The text distribution is not good and

why keep so many boundaries you can keep 1 or 2 utmost and here you can merge material science and advance fabrication into one boundary remove material science heading and make it a single section that fits the screen.

ADVANCED FABRICATION

3D printing and fabrication services for engineering prototypes.

Experience desktop additive manufacturing with premium workflow support, high-detail finishes, and fast turnaround.

MATERIAL SCIENCE

High-quality materials and logistics for reliable prints.

We use vacuum-sealed filaments and industrial best practices to deliver strong, accurate parts every time.

MATERIAL	CHARACTERISTICS	PRICE
PLA Polylactic Acid	High detail, biodegradable, ideal for prototypes.	₹10/g
PETG Copolyester	Durable, UV resistant, functional engineering parts.	₹12/g
ABS Impact Polymer	Heat resistant, impact-proof, high structural load.	₹15/g

14. This occupies more space, almost 1/3 rd of the cart. It doesn't seem cool to change accordingly .Also keep images at the background of the card and at bottom you can add this text Industrial experts like a photo of kundan teaching or something like that same for other carts to add relevant images.
15. In core services in workshops don't add all those carts we are doing only robotics/STEM workshop. Remaining we are not doing so don't add them you can showcase what things we are doing in the workshop.

Workshops

3D Printing Services

 **Robotics Workshops**

Modular robotics labs with AI-driven control, autonomous system design and physical prototyping for students and teams.

Programmable robot systems

Real-time sensor integration

Team-based campaigns

 **AI Education**

Structured AI curriculum focused on computer vision, machine learning, robotics perception and real-world deployment.

Model building labs

Hands-on datasets

Ethical AI frameworks

 **Embedded Systems**

Firmware development and embedded controls training for next-generation mechatronics and IoT devices.

Microcontroller design

Firmware testing

Low-latency control

 **Mechatronics Training**

Integrated mechanical, electronic and software training that bridges prototype design and advanced automation.

 **IoT Solutions**

Connected systems design with smart analytics, cloud telemetry and embedded device orchestration.

 **Product Prototyping**

Rapid prototype development from concept to working demonstrators, optimized for performance and scale.

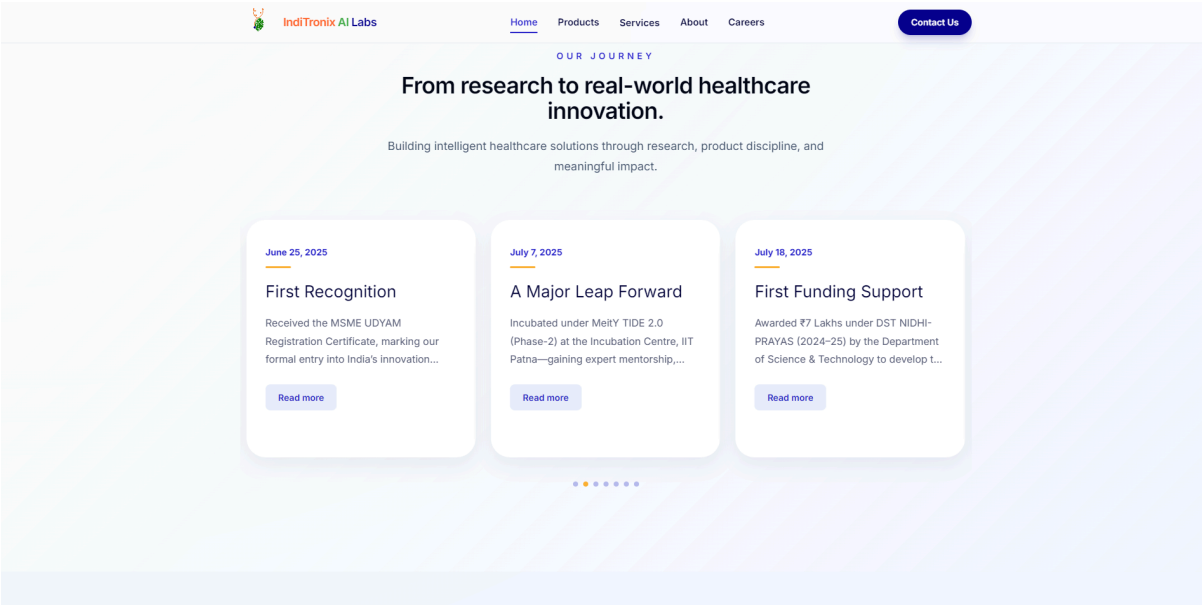

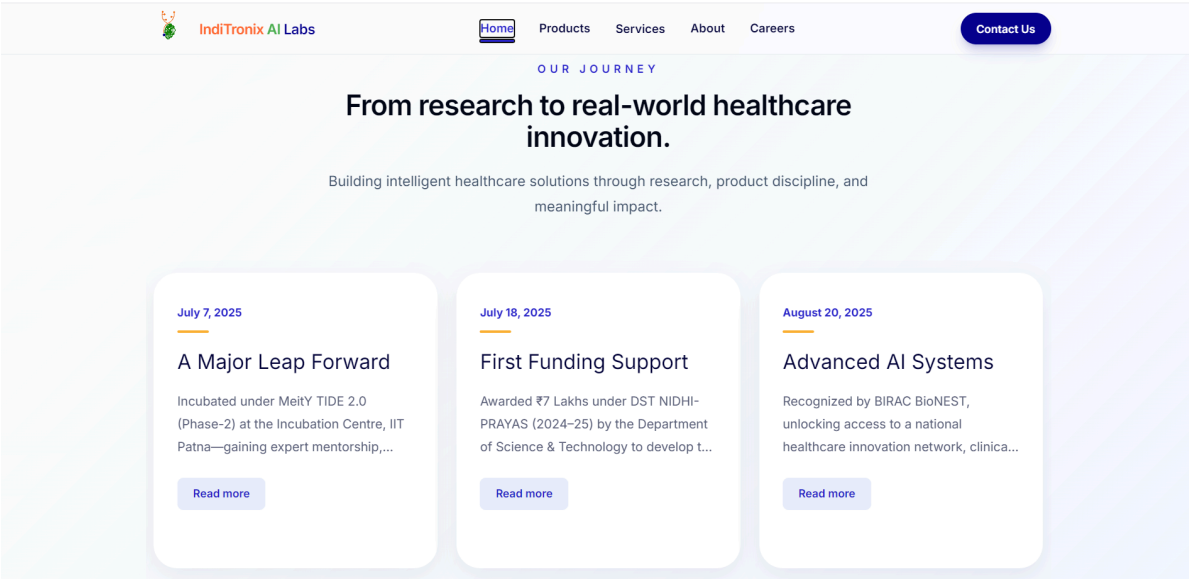

16. Kindly make separate pages for workshop and 3d painting don't add both in single page write now if i select workshop only a single section is getting changed in the same page it shouldn't be like that we need separate page for workshop entirely. Just like how I have shown in my snitch file that I shared.
17. don't keep fading text in Ignite Innovator cart and also adding Most popular looks good but add it doesn't have to shift the remaining text downwards fix it..

18. The Browse full catalogue button is not working.
19. In parent name rather than John Doe add some Indian Name

The image shows a contact form titled 'GET IN TOUCH' with the heading 'Questions about kits, workshops, or fabrication services?'. It includes a paragraph stating the team is ready to help with pricing, custom training, and project planning. On the left, there are three input fields for contact information: a phone number (+91-7501034630), an email address (inditronixallabs@gmail.com), and a location (IC IIT Patna, Bihar, India). On the right, there are four input fields: 'Parent name' (with 'John Doe' as a placeholder), 'Student age / grade' (with 'Grade 8' as a placeholder), 'Phone number' (with '+91 00000 00000' as a placeholder), and 'Interest area' (a dropdown menu with 'Basic Robotics Workshop' selected). A 'Submit registration' button with a right arrow is located below the input fields.

20. The website is not fighting to the screen you see for my laptop it looks okay but for PC it looks differently. Make sure it fits the screen automatically.

See here if I look at the PC screen it's like a lot of space is there sidewise making it look more like a word doc with a huge boundary.
